

Compact, lightweight flexible flat cables

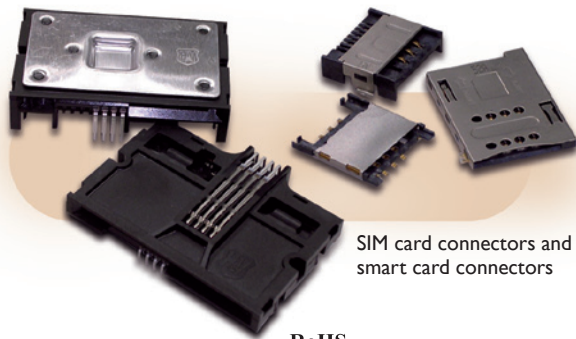

Delivered in 3 weeks

Our flexible flat cables are compact, lightweight and thin. And since they are softer and more flexible than competitors', you're given the freedom to design terminations in accordance with many different wiring environments. In addition, we produce the FFC modules these cables are based upon.

We have also developed hundreds of types of smart card connectors, all of which are 100 percent compliant with the RoHS Directive. And completed orders can be delivered in as fast as three weeks. Contact us now to find out more.

Customizable flexible flat cables

SIM card connectors and smart card connectors
